ARYAN MANKAME

Full Stack Developer

About Me :

Passionate about learning new skills and aspects of new domains and want to be a contributor of the era where technology has actually become a backbone of every industry, every problem of mankind can be solved through technology. I'm available for being part of any futuristic idea or vision and specially the one where a new race of intelligence is created by a creature that already exists.

PROJECTS

DISNEY HOTSTAR CLONE

ReactJS | Firebase | Redux

- Features : Signup using google auth, searching a movie, adding movies to watchlist.
- Front-End : React JS is used for designing the frontend , Redux is used to store the data in redux store.
- Back-End: Firebase is used to store the info about movies and the watchlist data of users.

H.O.W(House on Wheels)

ReactJS | Django

- The front end is built using Reactjs where the login and signup authentication is made using django used for backend.
- The website is a carvaan booking website which provides you an awesome travel experience.
